Batch starts from 24-11-2025 to 28-11-2025

## Overview

The Online Hospital Management System is a web-based application designed to improve the quality of healthcare services by making hospital processes more convenient, efficient, and accessible to patients. The system allows users to book appointments, search for doctors based on disease or specialization, receive notifications, and access medical prescriptions online without needing to visit the hospital physically.

## Goals

To provide quality treatment and improve patient experience by offering a smart online healthcare platform that saves time, reduces manual work, and makes medical services accessible anytime and anywhere.

## Specifications

The Online Hospital Management System is designed with both functional and non-functional specifications to ensure smooth operation and improved healthcare experience. Functionally, the system provides essential features such as online appointment booking

## Design Requirements

Professional hospital color theme: Blue + White + Light Gray

Clean typography and icons

Smooth animations and user-friendly layout

## Project screenshots

# Quality Treatment at Your Fingertips

Experience world-class healthcare with our comprehensive online hospital management system. Book appointments, consult with specialists, and manage your health records seamlessly.
